9. 9. Algorithms and Data Structures
10. 10. Test Design
11. 11. Project Plan
12. 12. References

1. Customer Problem Statement

Users in Madison, Indiana lack a centralized tool to browse used cars from all local dealerships. Clay'sCars.com provides a solution by aggregating listings into one easy-to-use interface with smart search features.

2. System Requirements

- The system shall display cars with images, price, and dealer.
- The system shall allow filtering by make, model, year, and price.
- The system shall store favorites in local storage.
- The system shall support offline usage with embedded data.

3. 3. Functional Requirement Specification - [Section content to be expanded]
4. 4. System Sequence Diagram - [Section content to be expanded]
